# SATHIYANARAYANAN P

ASSOCIATE SOFTWARE ENGINEER / QA ENGINEER (ENTRY LEVEL)

+91 6382011909 | sathiyanarayanan3177@gmail.com | LinkedIn: linkedin.com/in/sathiyanarayanan

## PROFESSIONAL SUMMARY

Entry-level QA Engineer with hands-on experience in Manual Testing, Selenium Automation using Python, API testing with Postman, and SQL-based data validation. Skilled in test case design, test execution, defect tracking, and web automation. Strong understanding of SDLC, STLC, and software quality practices. Seeking an Associate Software Engineer / QA Engineer role to contribute to high-quality software delivery.

## TECHNICAL SKILLS

Testing: Manual Testing, Test Case Design, Test Execution, Regression Testing, Smoke Testing, Defect Tracking, Bug Life Cycle

Automation: Selenium WebDriver (Python), PyTest (Basic), XPath, CSS Selectors, Explicit Waits

API Testing: Postman, API Request/Response Validation

Database: SQL, MySQL, Oracle (Basic Queries, Data Validation)

Programming: Python (Basic), OOP Concepts

Tools: JIRA, Git, GitHub, VS Code

Concepts: SDLC, STLC, Agile Basics, Test Documentation

## PROFESSIONAL EXPERIENCE

Junior Electrical Engineer – Cogent Automation Pvt Ltd | Mar 2025 – Present

• Performed functional testing and troubleshooting of industrial automation systems before commissioning.

• Executed panel wiring, field wiring, and wiring harness assembly for electrical control systems.

• Conducted electrical component testing and calibration to ensure system reliability and safety.

• Prepared electrical layouts, wiring diagrams, and technical documentation using CAD tools.

• Maintained test reports, SOP documentation, and quality records supporting audit and compliance processes.

## INTERNSHIP EXPERIENCE

Data Science Intern – NullClass | May 2024 – Jul 2024

• Validated data outputs using Python libraries including Pandas and NumPy.

• Performed data testing and verification for datasets used in analysis workflows.

• Documented test results and identified inconsistencies in datasets.

## PROJECTS

Web Application Test Automation (Selenium – Python)

• Automated login and form submission test scenarios using Selenium WebDriver.

• Developed smoke test scripts using PyTest.

• Implemented XPath and CSS locators with explicit waits for stable automation.

• Reduced repetitive manual testing by automating key test flows.

Real-Time Translation Application – GUI Testing

• Executed functional testing of UI workflows and user interactions.

• Validated API responses using Postman.

• Identified UI defects and documented test cases and defect reports.

## EDUCATION

B.E – Electronics and Communication Engineering – Mahendra Institutions | 2020 – 2024

HSC – Govt. High School | 2018 – 2020
